Re: J&A (International) Products Statement

UK – REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals)

EU - REACH (1907/2006/EC)

The products produced by J&A (International) Ltd are products which do not have a registration obligation with REACH.

Our products do not contain 'substances of very high concern' (SVHC) at a concentration level which would result in the need to register them on 'preparations/articles' level, annex XIV of the REACH regulation (EC 1907/2006) published in the updated Version by the European Chemicals Agency (ECHA), or the UK REACH Authorisation List (Annex 14),

Our Silver Reflective Flame Retardant (IF) Transfer Product does contain Triphenyl phosphate which is listed on the 31st SVHC Substances, released on the 7th November 2024. J&A (International) Ltd is an GB Importer of this article.

Types of Chemicals Used

J&A International Ltd is continually striving to use more environmentally friendly chemicals as possible to produce a hardwearing product that withstands domestic washing, industrial washing and flame-retardant requirements.

No toxic labelled chemicals are used in the production process and once the product is fully cured the product is deemed as safe and non-toxic, and does not require a Material Safety Data Sheet (MSDS).

No Personal Protective Equipment (PPE) is required to handle or to apply to cotton garments.

Some modern FR fabrics may require pre testing if fumes are produced in the heat-seal process of applying transfers or badges to them.

Restriction of Hazardous Substances in Electrical and Electronic Equipment (RoHS)

There are no known listed products in this directive in our products we manufacturer. This includes:

Cadmium (Cd):

Lead (Pb):

Mercury (Hg):

Hexavalent Chromium (Cr VI)

Polybrominated Biphenyls (PBB):

Polybrominated Diphenyl Ethers (PBDE):

Bis(2-Ethylhexyl) phthalate (DEHP):

Benzyl butyl phthalate (BBP):

Dibutyl phthalate (DBP):

Diisobutyl phthalate
